

Finally...a real product to increase RevPAR

Introducing the new InnFlux GuestPC™ for in-room or lobby use

The new in-room or lobby InnFlux GuestPC™ is specifically designed for the hospitality industry. Because the operating system loads in RAM, guest settings and downloaded files are not stored long-term. As soon as the PC is restarted, it reloads its original settings. So let your guests download viruses or surf to those undesirable websites. Whether they try to or not, they can't harm the computer's operating system. What does that mean for you? No maintenance, no virus scanning, a PC running at full optimization, and best of all, another way to increase your room rates while building guest and brand loyalty.

Tantus now offers these units as part of its InnFlux GuestPC Service or for Outright Ownership. See pricing sheet for more details.

Features

- **PC built-in to 17" 1280x1024 Flat Panel LCD monitor**
PC integrated into the monitor saves desk space and reduces the number of cables and bulky items that can break. (keyboard and mouse included)
- **Operating System - Secure Version of Windows XP (embedded)**
Immune to Viruses and Spyware. Users' personal information is erased after every reboot. Uses much fewer processor and RAM resources.
- **Auto Log-off**
Automatically logs a user off after a pre-determined amount of time at which point all history, viewed screens, files, etc. are all cleared from the computer, disallowing a second guest from seeing anything inappropriate or confidential. Any potentially harmful programs or files are erased upon logoff
- **Productivity Tools**
 - *Internet Browsers: Microsoft® Internet Explorer and Mozilla® Firefox*
 - *Instant Messaging for AIM, MSN, and Yahoo*
 - *Create, edit, or open Microsoft Office® documents*
 - *Citrix Client, Remote connections like Microsoft RDP, Linux NoMachine, XDMCP, VNC, SSH, Telnet*
 - *Check email or use the Calculator, Notepad, File Browser, more*
- **Remote administration**
Tantus technicians can alter settings quickly through remote connectivity and administration
- **Games and downloadable movies (optional, no-cost)**
Offers several games for children and adults alike. Allow guests to download and view movies through online movie services.
- **Wired or Wireless Connectivity**
Providing ultimate flexibility
- **Advertising Capabilities (optional)**
Advertise your hotel's services through this portal (in production)
- **Physical Security, Theft-deterrence**
Security screws and security cable included with each GuestPC; includes warning to guests that PC will not work outside hotel and they cannot change settings
- **Allow Guest Printing from the Room**
Let guests maximize productivity by printing (e.g. boarding passes) from their room. Offered in conjunction with Tantus' front desk printing option
- **Parental Control (optional, no-cost)**
Through InnFlux HSIA, allows parents to disable access for in-room GuestPCs
- **Speakers built-in; Microphone, USB (4), and Printer Ports for External Devices**
Print in the lobby; USB ports allow users to save or open previously saved files onto the computer
